

303/ acid breaks - tribute track - comments

Posted by TrueSkool - 2015/12/07 12:25

Comments welcome - still making adjustments to this one.

<https://soundcloud.com/true-skool-music/skynet-vs-carbon-renegade-drugs-n-koolaide>

Collaboration between Skynet and Carbon Renegade for our tribute/ throwback album dropping January 2016.

about: True Skool is proud to bring you some transistor bass as we pay tribute to the early days of Techno with tracks by various TSM artist that coalesce acid, 303, 808, 909 sounds we love into their art. It's a new type of throw-back for everyone who loves the Roland sound which became a staple and infused in the roots of Electronic Dance Music. We want to pay homage to these sounds that we grew up on and have affected and shaped our music today. Transistor Bass VOLUME 1 rolled out with some hard hitting Florida producers and dj names involved.

If anyone has 303/ acid themed track - still time to get involved. Looks like we have enough interest to do a volume 3 also.
